

The Board of Trustees embraces energy conservation and believes it to be the district's responsibility to ensure every reasonable effort is made to conserve energy and natural resources while exercising sound financial management.

The board recognizes the importance of adopting an energy conservation policy. The board also affirms the implementation of this policy will be the joint responsibility of the board, district administration, faculty, staff, students, and support personnel. Success is based on cooperation among all groups.

To ensure the overall success of the behavior-based energy conservation program, the following areas will be emphasized:

- A. A district facilities office will be accountable for energy conservation, including conducting energy audits and providing timely feedback.
- B. All personnel at each campus/site are expected to make a positive contribution to maximize energy conservation and should view energy conservation as a core responsibility. The district shall develop and implement an energy conservation monitoring plan for its facilities and systems, including heating, ventilation and air conditioning, building envelope, and moisture management.
